

Joseph

Welcome back, my name is Joseph Harrall and I have an Accent 1400 which is a piece of me, it goes everywhere with me. The best feature is the feeling for me to be able to say something about what is on my mind.

Spelling comes easy as I use the icons for all my schoolwork and communication, and if I can't find a word I just icon and tutor it. I taught myself on how to use my device and believe you should teach yourself because I believe the best teacher is you and that is what an old friend said to me and I have never looked back just forwards. Your future is now in your hands and the world is your oyster you now have the power to make life better for yourself and everyone around you, best motto is try anything that comes your way and remember you can do anything if you put your mind to it. I have a saying and that is I can do it and want you to think that too. You now have a voice and you can use it in your core in your communication device and it will be a piece of you forever. Just imagine what you think you can say anything you want to and best piece of communication is that it gives you the power to talk to everyone.

I have a bank of words which is use a lot which are (I, Please, A, The, When, How, What, Why, You, Are, Is, Thank you and many many more. I use my device every single day and I find new things - how often do you use your device more time on your device the better you will be and much happier so that you can express yourself without help from anyone.

I'm Joseph Harrall and would like to say goodbye until next time, I'm happy to talk so if you want to talk to me you can email me at joey.harrall1@gmail.com or you can find me Facebook. Thanks for reading my blog.
