

Avaz

Flexible communication for every voice

Avaz is a symbol-based AAC app designed to support a wide range of communicators. With an intuitive layout, flexible vocabulary options and strong multilingual support, Avaz helps people communicate in ways that suit them.

Built for everyday use, Avaz offers consistent access to vocabulary through a home screen toolbar – making communication faster, more efficient and easier to navigate across pages.

Visual, intuitive communication

Tailored to you

Fast, flexible access

Communication that works for you

Through flexible organisation and personalisation options, Avaz adapts to your communication style and needs.

- **Category-based grid system** – Organise vocabulary in meaningful ways.
- **Custom vocabulary options** – Choose layouts that match needs and preference.
- **Consistent toolbar access** – Navigate quickly across pages.
